

What They Say In London
©Tim Harrison and Second Avenue Songs

It's what they say in London
That's really in the swing
If you got no name in London
Then you ain't got anything

Who's in is always known in London
Who's out is never put to test
Those in the know they live in London
Because they're better than the rest

It never rains you see in London
The sun is always said to shine
There's no suffering in London
Everyone is always fine

They say that truth is told in London
And their ideas there reign supreme
There's no place else to be but London
So you can see there and then be seen

And if you're leavin' London
Just remember when you roam
That when you're gone from London
You can make it on your own

And when you're gone from London
You'll be just fine on your own
